THE BEST PLASTIC SURGERY is in patients you cannot tell have had it” is the guiding principle at the Bengtson Center for Aesthetics and Plastic Surgery. Board-Certified Plastic Surgeon, Dr. Bradley Bengtson, has been focused on providing safe, naturally restored and refined results, along with the highest level of patient care, for 20 years. His state-of-the-art surgical expertise has earned international acclaim. At the Bengtson Center, he has created a five-star center of excellence and service for concierge rejuvenation, providing comprehensive and individualized cosmetic and plastic surgery services as well as non-surgical solutions and physician-directed skincare. The center’s ambiance is evocative of checking into a fine hotel, with a private post-surgical entrance for patients. Beautiful surroundings – complete with a fireplace, warm reading nook and skin-care bar – greet patients upon arrival. A concierge welcomes guests and discretely directs them to either the skin care, Botox®, filler or plastic surgery center, each staffed with highly skilled medical professionals, including the newest member of the practice,

Dr. Ryan Mitchell.

Dr. Bengtson also offers body contouring with the SlimLipo™ laser liposuction system, Vectra 3-D imaging and simulation, and is one of the top Board-Certified Plastic Surgeon Injection Trainers in the country for BOTOX® Cosmetic and Juvéderm® Facial Fillers. Dr. Bengtson has also achieved Allergan’s Black Diamond Level Status – their top-level physician practice award.

As a nationally recognized leader in breast related surgeries – from breast augmentation to revisional breast surgery, breast lifts and reduction – Dr. Bengtson was a lead investigator for the 410 “gummy bear” cohesive gel breast implants, recently FDA-approved. Additionally, he is a national and international educator in breast aesthetic surgery and a renowned author on the subject. Greatly lauded by his peers, Dr. Bengtson has shared his expertise in breast augmentation surgery and other cosmetic procedures – both surgical and non-surgical – with tens of thousands of colleagues around the world. His peers have awarded him the plastic surgery “Best Doctors in America®” title consecutively

since 1996, and he is a double recipient of the Tiffany Award, the American Society for Aesthetic Plastic Surgery’s most prestigious research and scientific honors. Locally, readers of Grand Rapids Magazine have named Dr. Bengtson “Best Plastic Surgeon” in the annual “Best of GR” awards for the past four consecutive years. Perhaps that is why the Bengtson Center for Aesthetics and Plastic Surgery is one of the most prestigious plastic surgery practices in the country!
