BENGTSON CENTER FOR AESTHETICS & PLASTIC SURGERY

Bengtson Center for Aesthetics & Plastic Surgery is the first and only plastic surgery practice in West Michigan offering the amazing Canfield VECTRA® 3D Imaging and Simulation system to patients. The powerful before and after three-dimensional images simulated by VECTRA show the range of results patients can expect following breast augmentation.

In addition to VECTRA, Dr. Bengtson, an innovator in the science of aesthetic surgery, is pleased to offer many new technologies. First is the injectable cosmetic, Kybella,™ a double chin treatment. Next is Cellfina,™ designed to eliminate the dimpled look caused by cellulite on thighs, buttocks and lower extremities. Finally, the reliable and safe MicroPen TR,™ a leap forward in tattoo removal technologies. The Bengtson Center is the first to offer Cellfina and MicroPen TR in West Michigan and the first of twelve practices to offer Cellfina in the world.

Dr. Bengtson is a Board-Certified plastic surgeon dedicated to helping his patients achieve the surgical or non-surgical results they desire. Learn more by visiting his website or calling for a consultation.
