

BRADLEY BENGTON, MD

BENGTON CENTER FOR AESTHETICS AND PLASTIC SURGERY
GRAND RAPIDS, MICHIGAN

ON

THE BEAUTY OF SYMMETRY

After performing thousands of breast augmentations, breast revision procedures and tummy tucks, Dr. Bradley Bengton has honed his successful process and approach to meeting each patient's optimal outcome in combination with each other. "We are always striving for the best natural, proportional result," says Dr. Bengton. "We have a very unique patient-centric practice. At the Bengton Center, it is all about the patient." Utilizing the most current techniques and technologies, he continues to raise the bar for exceptional patient outcomes. "The best plastic surgery is when you can't even tell someone has had any work done," he says. "I'm passionate about bringing art and innovation to my field and consistently delivering the best possible results." It is for this reason, patients in the Midwest continue to choose The Bengton Center as their provider for breast and body work.

Major advancements in body contouring have maximized results and minimized potential risks.

WHO I AM

1.

HOW DOES YOUR STAFF ENHANCE YOUR PRACTICE?

We have the most innovative, top-tier nonsurgical technology, a warm and inviting environment and a surgeon with tremendous experience and vision, but it's our cohesive team that holds it all together

2.

HOW ARE YOU HELPING TO ADVANCE YOUR FIELD?

By continuing to research and publish about breast revision techniques. I'm also developing new medical devices and preparing to launch a new internal tissue closure device—essentially an internalized VAC—and developing the first high-resolution ultrasound platform for breast implant patients

3.

WHAT ARE YOUR MOST REQUESTED PROCEDURES?

Breast augmentations, breast revision surgeries, tummy tucks, liposuction, facelifts and blepharoplasties

4.

WHAT NEW SERVICES ARE YOU EXCITED TO OFFER?

Cellfina® with microneedling and platelet-rich plasma (PRP), ThermiVa for vaginal rejuvenation, ThermiRF® skin tightening, the Nordlys Ellipse® Hybrid Laser platform, the latest in injectable treatments, new skin care lines, and HydraFacial®

5.

WHY DO YOU EMPLOY A LESS-IS-MORE PHILOSOPHY?

The best plastic surgery is in patients you can't tell have had it. If fillers or Botox® Cosmetic are visible, then they were not done correctly. It's all about restoring a natural-looking volume or contour. Some patients require surgery versus a less-aggressive nonsurgical approach. It depends on what their concern is, what results they want to achieve and what they are bringing to the table. Today it's all about youth preservation

MOMMY MAKEOVER

This 41-year-old patient desired fuller, natural-looking breasts and a flatter stomach. Dr. Bengton performed a breast lift and tummy tuck to give her the beautifully contoured shape she'd always wanted.

MY DREAM INNOVATION

A new technology that will eliminate seromas and allow for normal healing

THREE WORDS THAT BEST DESCRIBE ME

Innovative, caring, compassionate

HOW I WOULD SPEND EXTRA TIME IN A DAY

With my family

ABOUT DR. BENGTON

Dr. Bengton and his team are excited about the Bengton Center's new office with double the space and staff, including two operating suites to provide patients with even more surgical and nonsurgical options. The new Bengton Center location is now open.
