

How are you helping to advance your field?

By continuing to research and publish about breast revision techniques. I'm also launching a new tissue-closure device.

What are your most requested procedures?

Breast augmentations, breast revisions, breast reductions, tummy tucks, body sculpting, liposuction, facelifts and eyelid surgery.

What new services are you excited to offer?

The most advanced nonsurgical treatments like CoolSculpting Elite, ProFound RF Microneedling and QWO for cellulite.

About

Bradley Bengtson, MD

Mommy Makeovers, combining breast and body procedures, are now among the most common requested surgeries. State of the art breast augmentation and abdominoplasty require top tier technology, techniques and clinical experience. Performing hundreds of tummy tuck and breast procedures a year, Dr. Bradley Bengtson is renowned for his body contouring and breast augmentation expertise. "New innovations that make breast surgery an easier process to undergo include: 3-D simulation and implant selection, higher fill and highly-cohesive gummy-bear implants, bloodless surgery, local anesthetic blocks, Fast-Trak Recovery and high-resolution ultrasound breast implant follow-up," explains Dr. Bengtson. "We have also a new surgical drain substitute called Interi[®] that can help eliminate seromas and speed up the healing process." These breakthroughs will benefit countless patients and surgeons around the world.

"This is what innovative and state-of-the-art breast and body work looks like."

State-of-the-Art Results

This 41-year-old patient desired fuller, natural-looking breasts and a flatter stomach. Dr. Bengtson performed a breast lift and tummy tuck to give her the beautifully contoured shape that she had always wanted.
